PROFILE

Video game student at CITM – UPC looking for a ***level design internship***. I designed the puzzles and zone layout of a level in a team of about 30 and placed its cameras for a cinematic tone. I also write gameplay code, so I can talk to programmers and test my own ideas.

PROJECTS

Son of Ithaca — *2026*

Level designer (Level 1) & enemy programmer · 3D action-adventure based on *The Odyssey* · Nobody Games Studio, team of about 30

- Designed Level 1: its puzzles and the distribution of its zones.
- Placed the cameras in Level 1 to give it a more cinematic tone.
- Programmed the enemy base that the game's enemies are built on.

nobody-games-studio.itch.io/son-of-ithaca

The Apprentice — *2025*

Gameplay programmer · 2D Metroidvania starring a slime that transforms into animals · Pangolin Studios, team of about 16

- Programmed the main character in C++ with SDL and Box2D.
- Implemented the movement abilities the player unlocks: double jump, glide, dash, wall slide, wall jump and pushing objects.
- Built the animation state system, with priorities between states.
