PROFILE

Level designer with two team projects in two years. I designed the puzzles and zone layout of Level 1 of ***Son of Ithaca*** (team of about 30) and programmed a 10-ability movement kit for ***The Apprentice*** (team of about 16). I code in C++ and C#, so I can prototype my ideas and work with programmers.

PROJECTS

Son of Ithaca — *2026*

Level designer (Level 1) & enemy programmer · 3D action-adventure based on *The Odyssey* · Nobody Games Studio, team of about 30

- Designed the puzzles and zone layout of Level 1, built around the game's mask powers.
- Placed the cameras across Level 1 to give it a more cinematic tone.
- Programmed the enemy base class that all the game's enemies are built on.

nobody-games-studio.itch.io/son-of-ithaca

The Apprentice — *2025*

Gameplay programmer · 2D Metroidvania starring a slime that transforms into animals · Pangolin Studios, team of about 16

- Programmed the main character from start to finish in C++ with SDL and Box2D.
- Implemented 10 movement abilities that unlock progressively, including jump, double jump, glide, dash, wall slide, wall jump and push.
- Built the animation state system with priorities between states.
